SUMMARY

AI Engineer with 2+ years of hands-on experience designing, building, and deploying production-grade LLM systems, RAG pipelines, voice agents, and AI automation workflows. Strong expertise in Python, LangChain, Supabase Vector DB, n8n, CRM integrations and OpenAI APIs, with a proven track record of delivering scalable, real-world AI solutions across customer support, marketing automation, and intelligent data extraction. Experienced in taking AI systems from prototype to production with a focus on reliability, performance, and maintainability.

WORK EXPERIENCE

AI/ML Engineer | AppSynergies Technologies Ltd., London (Remote) July 2025 - Present

- Designed, built, and deployed end-to-end RAG systems using LangChain, Supabase Vector DB, and n8n, supporting 3–5 production AI assistants and 10k+ knowledge documents for real-time retrieval.
- Developed and deployed AI voice agents for appointment booking, customer support, and feedback collection, handling 500+ automated interactions per week with minimal human intervention.
- Architected a modular CRM platform with 12+ business modules (Leads, Tasks, Reports, AI Agents), using n8n for backend automation and Supabase for data management, enabling scalable deployment across client environment.
- Engineered scalable n8n automation workflows with secure token refresh, robust error handling, and latency optimization, reducing workflow failures by ~35% and improving average response time by 25–30% in production.

Data Science Intern | Bharti Airtel Ltd. - Gurugram, Haryana January 2024 - April 2024

- Contributed to an LLM-driven multi-agent system for telecom plan analysis and dynamic configuration.
- Cleaned, analyzed, and structured large-scale datasets (100k+ records) covering plans and user usage patterns to support data-driven business insights.
- Collaborated with seniors on API integrations and assisted in validating ML models, improving model reliability.

PROJECTS

Last Model Standing — Multi-Agent LLM Strategy Simulator February 2026

- Built a multi-agent AI simulation where LLM-powered players compete strategically using a FastAPI engine.
- Tech: Python, FastAPI, LLMs, Ollama, React, Prompt Engineering

AstroSense — Domain-Specific LLM Assistant August 2025

- Built a hybrid AI system combining RAG-based knowledge retrieval (Supabase Vector DB) with deterministic API pipelines, using dual-LLM orchestration for intent routing, validation, and grounded response generation.
- Tech: n8n, LLMs, VedicAstroAPI, JSON orchestration.

CareerPathAI — Career Recommendation Assistant August 2025

- Developed an LLM-based chatbot delivering career recommendations using prompt-driven logic and retrieval.
- Tech: Python, LangChain, GPT-4, Streamlit, Docker.

CricVision — Sports Outcome Prediction System July 2025

- Built ML models to predict IPL match outcomes with probability-based insights and performance visualization.
- Tech: Python, Pandas, Scikit-learn, Plotly.

EDUCATION

Bachelor of Computer Applications April 2025

- Brihan Maharashtra College of Commerce (BMCC) - Pune, Maharashtra - Scored 7.44 CGPA

Relevant Certifications

- AI Engineer Core Track: LLM Engineering, RAG, QLoRA, Agents September 2025
- Data Science, Machine Learning, DL, NLP Bootcamp June 2025

SKILLS

- Core AI Skills: LLMs, RAG, Prompt Engineering, Retrieval Optimization, NLP, Transformers, Vector Search
- ML & DL: Machine Learning, Deep Learning, Model Evaluation, TensorFlow, Keras, PyTorch, Scikit-learn
- Backend & Automation: Python, LangChain, n8n, Supabase, REST APIs, Webhooks, CRM Integrations, ManyChat
- Data & Vector Databases: Supabase Vector DB, Embeddings, Similarity Search, Metadata, Data Preprocessing
- Deployment & Cloud: Docker, CI/CD Basics, AWS (EC2, S3), Azure (Azure OpenAI), Render, Git, Linux
